

Tadeas Jun

Software engineer

EXPERIENCE

Developer

Open-source projects

July 2021 - present

Over the last few months, I have been working on a series of open-source coding projects, including various bots for the chat platform Discord (in NodeJS), as well as a work-in-progress Android note app (Java).

Developer & game tester

Freelance

May 2020 - present

I have worked on several freelance projects, predominantly via the Fiverr platform, mainly around NodeJS and the Discord API.

Android / NodeJS developer

Art Prompts (personal project)

December 2019 - May 2021

Designed and developed the Art Prompts

[Android app](#) (50k+ downloads), as well as the tie-in [Discord bot](#).

Author

Eledris blog

February 2019 - November 2020

Researched and written 50+ articles about worldbuilding, writing, art, and game development.
